

Threephase industrial vac with powerful side-channel blower

ATTIX 145 and 155 are mobile industrial vacs available with a powerful double stage side-channel blower and 100L capacity bin. The all-steel construction secures a strong and reliable machine for heavy industrial vacuum cleaning in mechanical, ceramics, food and chemical industries.

Thanks to its high performances, ATTIX 145 & 155 are the ideal industrial three phase vacs for the general cleaning in all kind of industry, especially when large quantity of dust have to be collected. They can run for many hours without requiring maintenance thanks to their very silent and reliable double stage side-channel blower. The lower position of the blower gives it a great stability even when moving on rough floors. A handle all around the machine allows pulling or pushing it from a working place to another one. L-class filter is fitted as standard, but M-class filter and HEPA-filter is available as option when fine dust has to be removed. Furthermore the manual filter shaker guarantees a perfect efficiency of the filtration. An accessory box, a cable and hose/tube holder make ATTIX 145 & 155 very ergonomic and simplifies the daily work of the operator. From its protected position, the manometer shows to the operator when the filtration efficiency decreases, inviting him to shake the filter. The ON/OFF switch is placed on the rear of the chassis inside the carter in order to protect it against shock.

PRODUCT FACTS

- 2,2 or 4 kW side
- channel blower on a solid steel chassis,
- Strong and reliable,
- 100L SitDown container with castors & handle,
- Manual Filter shaker as standard,
- Cable, hose and tube holders,
- L
- class filter as standard,
- M Class and HEPA filters available as option,
- Mechanical floater as option for liquid collection,
- Accessory box & cable/hose holders,
- Manometer,
- Plug with phase inverter,
